

Trading High Probability Patterns with Price and Mathematical Analysis

This course aims to equip participants with full range of Technical Analysis knowledge and techniques for trading in equities and futures market. After the course and many practical sessions, participants will be able to formulate precise entry and exit plans in both lower (for intraday trading) and higher timeframe (for swing trading or investing).

This course has been accredited under the Skills Framework for Financial Services and is eligible for funding under the IBF Standards Training Scheme (IBF-STTS), subject to all eligibility criteria being met. Candidates are advised to assess the suitability of the course and its relevance to participants' business activities or job roles. IBF-STTS provides 90% course fee subsidy for direct training costs subject to a cap of S\$7,000 per candidate per course subject to all eligibility criteria being met.

The IBF-STTS Enhanced Funding Scheme and IBF Credit is eligible for Singapore Citizens or Singapore Permanent Residents that are physically based in Singapore.

To find out more about the IBF-STTS Enhanced Funding Scheme, please visit <https://www.ibf.org.sg/programmes/Pages/IBF-STTS.aspx>.

Key Learning Outcomes:

- Formulate a trading plan from entry to exit for use in equities and derivatives trading using full range of technical analysis techniques.
- Understand different market conditions and be able to apply different trading frameworks in different market conditions.
- Apply many assumptions and theoretical frameworks of technical analysis and be versatile to trade in these different market conditions— trending, reversal or sideways market conditions.
- Combine trend analysis, chart pattern analysis and momentum analysis in both mid- to long-term investment and short-term trading to profitably trade many financial instruments.
- Articulate technical analysis results to relevant stakeholders.
- Live case studies on both equities and futures on how technical analysis could be applied in conjunction with other financial analysis to improve decision making.

The Programme is Suitable for:

- Individuals who have an interest in trading and investing in securities and derivatives instruments
- Traders, professionals, or fund managers who wish to acquire a complete trading method complimented by a full range of technical analysis techniques
- Individuals seeking to get started in professional derivatives trading

Duration

- 12 hours of training:
 - 11.5 hours of virtual classroom training
 - 0.5 hours of assessment

After-Course Support (One-Month Support After the Course)

- Perform demo/live trades and submit details of these trades on week 1 & 2 after completion of the course
- Zoom webinars every Monday and Thurs for a total of 4 weeks after the course to review on market conditions, update on index futures (SiMSCI) and Q&A (12 noon to 12.30pm)
- Recording will be provided if you can't attend the after course support sessions (participants need to provide an email address to receive these recordings)

To gain maximum benefits from the course, you are strongly recommended to have a trading account before attending the class.

Trainer's Profile

Binni Ong has more than 15 years of experience in providing trading education to both institutional and retail clients. She invests and trades in a wide array of instruments such as equities, forex and commodities. Binni has a Master of Business. With her strong training in quantitative and statistical skills, she has taken a deep interest in quantitative trading methods. In the area of trading, she has developed many mathematical-base systems and specialises in projective ratio analysis and price action techniques.

Ms Ong has been invited to speak by BNP Paribas, Lim & Tan Securities, CIMB Securities, Phillip Futures, OCBC Securities, Singapore Exchange and other financial institutions and brokerages. Miss Binni Ong is also regularly interviewed by business media such as Lianhe Zaobao and other Chinese dailies on her insights into equities and

market conditions. She is also invited to give seminars and lessons overseas including Indonesia, Malaysia, and Hong Kong etc.

IBF Standards Training Scheme (IBF-STS)

This programme has been accredited under the IBF Standards, and is eligible for funding under the IBF Standards Training Scheme (IBF-STS), subject to all eligibility criteria being met.

Candidates are advised to assess the suitability of the programme and its relevance to participants' business activities or job roles.

Under the Enhanced Funding Support for IBF-STS and IBF Credit, MAS will enhance course fee subsidies for locals attending accredited or recognised courses up to 90%. This existing scheme will also be expanded to include workers in eligible FinTech firms.
